GO DEEPER. FASTER. LONGER!

WITH THE

FOAMING CUTTING OIL

THAT WORKS AS HARD AS YOU DO

SAY GOODBYE TO

- ✗ Dull drill bits
- ✗ Torn threads
- ✗ Tools that overheat and bind
- ✗ Cutting oils that drip away before they help

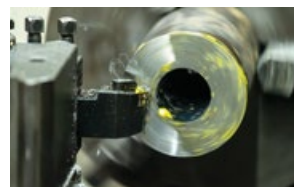

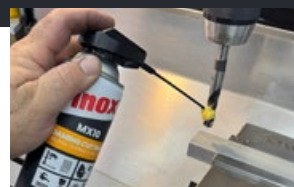

ENGINEERED FOR REAL-WORLD METALWORKING.

INOX MX10 Foaming Cutting Oil

INOX MX10 clings to tools and workpieces at any angle, delivering continuous extreme pressure protection exactly where the cutting happens.

Drills glide through steel. Taps turn smoothly without binding. Saw blades cut cleanly without chatter.

IDEAL FOR: Drilling, tapping, cutting, threading, machining, sawing, reaming, boring, turning, milling and fabrication

IMPROVE YOUR WORKDAY

- ✓ Cleaner, more precise cuts with superior surface finish
- ✓ Reduced heat and friction keeps tools sharper for longer
- ✓ Super clinging foam makes your overhead work easier
- ✓ Extended tool life with fewer replacements and lower costs
- ✓ Less physical effort for safer, more comfortable work
- ✓ Minimal mess with no swarf build-up, galling or drips
- ✓ One product for multiple applications and metals

TECHNICAL FEATURES THAT MATTER

- ✓ Semi-synthetic formula with extreme pressure (EP) additives
- ✓ Corrosion inhibitor leaves film to protect tools and workpieces
- ✓ Deep penetration into cutting zones where liquid oils flow away
- ✓ Chlorine-free and sulphur-free so won't stain sensitive metals
- ✓ Solvent-free for lubrication efficiency with minimal evaporation
- ✓ High visibility creamy foam to see your coverage
- ✓ Precision application straw attached to attack target points

METAL COMPATIBILITY: Ferrous and non-ferrous metals including stainless, hardened, carbon and tool steel, Inconel, Monel, Hastelloy, titanium, aluminium, brass, copper and other alloys
